

The Sound Consultant Difference!

With low overhead, no mid or upper management and the efficiency of working directly with three senior engineers, Sound Consultant clients enjoy the professional services of a large firm without paying for the costly markups.

Allow Sound Consultants to bid on your next proposal to demonstrate our competitive rates – with the quality and professionalism of a "big firm."

We are committed to building new relationships while preserving and enhancing our partnership with existing clients.

Experience the difference. Call us today at **(206) 930-3868** so we can prepare a proposal for your next project!

Sound Consultants, LLC

Introducing...
SOUND CONSULTANTS,
A Civil Engineering Group

"Sound Consultants worked on a number of Seattle Townhome projects for us and did a great job integrating the drainage, utilities, grading and roads. It's nice having an experienced engineer who's willing to help answer questions anytime we need advice."

- Gary Cobb, President, Cobb Construction Inc.

Benefits for You

- Efficiently constructed, cost effective civil designs that meet agency requirements.
- Assistance with site plan designs that effectively combine architectural and marketing demands with essential infrastructure needs.
- Professional construction management assistance to obtain the best bids, assure contract adherence, and resolve disputes quickly and equitably.
- Experience with key environmental technologies to provide innovative solutions where "tried-and-true" methods do not exist or are not practical.

Our Successes

We have completed designs and helped implement construction on hundreds of successful projects including Safeway, Nintendo, Arco, Seattle Parks and Recreation and the City of Federal Way to name but a few.

"We were very happy with the designs for our last two Chemical Distribution Facilities located here in Washington. They were not easy projects; Sound Consultants understood the environmental challenges and resolved the issues in a very timely manner."

Bob Code, President, [Cascade Columbia Distribution Company](#)

"Sound Consultants provided us with valuable client liaison and project management on our new state of the art Titanium Foundry in Montana. Sound Consultants used their background skills in Total Quality Management to identify and solve critical path issues, expedite the project and help make our project a wonderful success."

Mike Robins, President, [Seacast Inc.](#)
